TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PUCO. For example, the 4th revised Sheet 14 would cancel the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. that the PUCO follows in its tariff approval process, the most current sheet number on file with the PUCO is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets - When a tariff filing is made with the PUCO, an updated check sheet accompanies the tariff filing. The check sheet lists the sheet contained in the tariff and gives the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated on the check sheet with an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages.) The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the PUCO.

SECTION 3 - DESCRIPTION OF SERVICE

3.1 Timing of Calls

3.1.1 When Billing Charges Begin and Terminate for Phone Calls

The chargeable time for a long distance call is determined by the duration of the call. Chargeable time begins when connection is established between the calling station and the called station. When the called party picks up is determined by hardware answer supervision, in which the local telephone company sends a signal to the switch or the software utilizing digital format or audio tone detection. In any case, an unanswered call will not be billed. Chargeable time ends when the calling station hangs up or otherwise terminates the call. If the called station hangs up or otherwise terminates the call but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Underlying Carrier's operator.

3.1.2 Billing Increments

- A. Unless otherwise specified in this tariff, the minimum call duration for billing purposes is 1 minute for a connected call. Customers will not be billed for calls of 6 seconds less. After the first 6 seconds of a call, the Customer will be billed for 1 minute. Calls beyond 1 minute are billed in 1 minute increments.
