Grade Crossing Statistics Report

2013

Public Utilities Commission

John R. Kasich, Governor
Thomas W. Johnson, Chairman

Commissioners

Steven D. Lesser
Asim Z. Haque
Lynn Slaby
M. Beth Trombold

Dear Fellow Ohioans:

With 36 freight railroads operating approximately 5,300 miles of track and 5,800 public grade crossings, Ohio is the fifth leading state in terms of goods transported by rail. Being among the nation's leaders in rail traffic brings with it a great responsibility to ensure safety.

The Public Utilities Commission of Ohio (PUCO) regularly inspects and evaluates railroad grade crossings and implements safety improvements at crossings across the state. However, despite significant gains in crossing safety in recent decades, more than half of the train-vehicle crashes in Ohio still occur at grade crossings that have active warning devices. To improve public awareness of this issue, the PUCO works in conjunction with other rail safety organizations to highlight the importance of rail-highway grade crossing safety.

The PUCO prepares this report each year to help legislators, safety advocates and members of the public understand rail-highway grade crossing safety trends. Important safety information is broken down by county, and the information included in this report can be used to help you learn about the rail issues facing your community. The Ohio Railroad Information System website at <http://gradecrossings.puco.ohio.gov/> can be used to help you find specific information about highway-rail grade crossings near your home.

This report is available online in the railroad section of www.PUCO.ohio.gov. If you have questions or would like to obtain additional paper copies of this report, please contact:

Public Utilities Commission of Ohio
Rail Division
180 E. Broad Street – 4th Fl
Columbus, Ohio 43215-3793
(614) 466-1150

Sincerely,

Thomas W. Johnson
Chairman

Overseeing Ohio Railroad Safety

The PUCO works to ensure safety over approximately 5,300 miles of railroad track and 5,800 public railroad crossings in Ohio. PUCO rail staff works to accomplish this goal through inspections, safety upgrades and funding programs.

Railroad Inspections

PUCO rail inspectors monitor grade crossings, inspect railroad tracks and equipment and investigate all grade crossing incidents. These inspectors work across Ohio responding to the concerns of the public such as complaints of rough crossings, excessive noise, bridge debris and overgrown weeds and vegetation that can obstruct sight at railroad crossings. Safety at railroad crossings has improved greatly in recent years as a result of these activities.

Safety Upgrades

The installation of warning devices such as flashing lights and roadway gates is one way safety can be improved at rail crossings. Over the past 12 years, the PUCO has ordered safety upgrades at more than 1,700 crossings throughout the state, with over 82 upgrades approved in 2013. In addition, many other safety and engineering enhancements have been implemented at Ohio rail crossings.

Ohioans wishing to find more information about grade crossings in their community can visit the railroad section of www.PUCO.ohio.gov to learn more about the crossings and recent project upgrades.

Safety Improvement Funding Opportunities

Federal and state funding resources are available to local communities to implement safety upgrades and install lights and gates at grade crossings.

- **Federal Funding** – The PUCO, in conjunction with the Ohio Rail Development Commission, works to select Ohio grade crossings for federally-funded safety upgrades. Crossings for these upgrades are chosen based on a priority list that ranks the crossings in order of risk of accident. Criteria to determine the risk of accident include the number of tracks, average daily traffic, crash history, number of highway lanes, train speed and the number of trains per day. These projects are paid 100 percent through federal funds, and the PUCO requires the railroad to complete the improvements within one year of the date the Commission issues its order approving the project.
- **State Grade Crossing Upgrade Program** – For crossings not eligible for federal funding, the state funded Grade Crossing Upgrade Program allows local communities to share the cost of installing safety devices with the state and the local railroad. Communities who utilize this program may be required to pay between 25 and 65 percent of the cost of the project. The PUCO allocates funds for this program based on an objective formula measuring the need for safety upgrades at the crossing and any other special conditions that may be applicable.

Communities wishing to apply for state funding must submit an application to the PUCO for consideration. A PUCO inspector evaluates the crossing site to determine the appropriate level of funding assistance. Construction of the upgrades begins after a financial assistance proposal is approved by the local highway authority and the local railroad.

- Supplemental Assistance Program – A supplemental assistance program is administered by the PUCO to help communities install safety enhancements at crossings in addition to crossbuck signage or lights and gates. Through this program, the PUCO provides up to \$5,000 for physical improvements around the crossing, including rumble strips, illumination, improved signage or vegetation removal.

To apply for supplemental assistance, the local highway authority must submit an application to the PUCO for approval. If approved, a contract will be prepared for the local highway authority and the PUCO to sign. When construction of the project is completed and approved, the local highway authority can then submit the cost for reimbursement of up to \$5,000.

- Consolidation Program – In 1991 the Federal Railroad Administration set a goal to close 25 percent of highway-grade crossings in the United States, and the PUCO is committed to working toward this goal. The consolidation program works to eliminate unnecessary crossings in exchange for implementing safety improvements at other crossings along the same rail corridor. These improvements, such as lights and gates, signage and illumination are paid for through federal, state and railroad funds. When a local community agrees to permanently close a grade crossing to vehicle traffic the state works to provide funding for the agreed-upon upgrades.

Communities wishing to participate in the consolidation program should have the local highway authority contact the PUCO. A team surveys the site, evaluates the project and negotiates the levels of participation of the local highway authority and the railroad. Typically, local authorities hold public hearings before deciding to close a public crossing. The PUCO adopts a signed agreement by all parties before construction begins, and the Commission approves the program and issue project deadlines.

The Ohio Rail Hotline

The Ohio Rail Hotline at (866) 814-RAIL is a toll-free number administered by the PUCO, the Ohio Rail Development Commission, and the Ohio Department of Transportation. This hotline provides information and answers to questions about railroad crossings in Ohio, including:

- Specific railroad crossings;
- Funding for railroad crossing safety devices and other crossing improvements;
- Railroad operation in Ohio;
- Railroad development opportunities; and
- Rail corridor improvements or public grade crossing closures.

You can also visit www.OhioRail.ohio.gov for more information about Ohio railroads.

Questions or Concerns?

For more information about the PUCO's role in Ohio railroad programs, contact the PUCO Rail Division at (614) 466-1150 or visit the railroad section of www.PUCO.ohio.gov.

To report railroad emergencies, grade crossing crashes and other incidents, please contact the appropriate local railroad:

2013 Railroad Grade Crossing Statistics Report

Executive Summary

In 2013, the PUCO continued its important mission of monitoring rail transportation in Ohio. Improving safety is a vital part of this mission. A total of 82 federal, state and locally funded safety upgrades were ordered during the year including the installation of lights and gates, supplemental assistance upgrades, circuitry upgrades and closings.

There were 61 crashes at Ohio public crossings in 2013. The PUCO is proud of the success in Ohio rail safety. The number of train-vehicle crashes at Ohio public highway-rail grade crossings has significantly declined since the 1980s.

While the PUCO believes that active warning devices play an important role in rail crossing safety, there is much work to be done to educate motorists on how to safely travel across railroad crossings. More than half of the crashes in 2013 occurred at crossings with active warning devices. Many times, these crashes occurred because of motorist actions including failure to stop, driving around the gates or stopping/stalling on the tracks.

Statistics at a Glance:

- Total Crashes – 61
- Counties with no crashes – 54
- Injury Crashes – 15
- Number of Injuries – 17
- Fatal Crashes – 7
- Number of Fatalities – 8
